---

## Projects

---

### **ChatGPT :**

- Implemented ChatGPT features in the node and react.
- Created the restful APIs in the node.js using ChatGPT API key and implemented on the frontend (React js)

### **News Monkey :**

- It is a news app that shows top headlines of different sectors
- It uses the third party API call to generate the news data.

### **Narayan Peth sarees :**

- Its a e-commerce app that sell the Indian traditional clothes in which my role to manage the product data in the redux state management systems.
- Implemented the stripe payment gateway

### **Halo systems :**

- It's a Incident management product based company in which I implemented the different features like data fetching through API call on the frontend.
- Reduce unnecessary API call to improve the web app performance by 75% by optimizing
- Refactored non-reusable codebase, resulting in a more maintainable and scalable codebase.
